

# STONY PLAIN SUN.

VOLUME FOURTEEN

STONY PLAIN, ALBERTA, THURSDAY JULY 4, 1934

Whole No. 710

## ROYAL CAFE, STONY PLAIN.

(Phone 33)

Get your Exhibition tickets here---5 for \$1.

ICE CREAM Always on Hand--Phone in your orders and have them delivered.

FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

## NOTICE !

To Ratepayers of Municipal District of Inga No. 520.

Ratepayers in arrears of Taxes (not Consolidated) have still time to save 4% penalties being added by making payment on or before 30th June, 1934.

### Successful Poultrymen!

Are demanding the "Gillespie Maid" brand poultry and Dairy Feeds. Why? Because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results. See our nearest elevator agent.

**GILLESPIE GRAIN CO. LTD.**

## THE SANITARY MEAT MARKET.

Beef, Pork, Veal and Lamb. Fish & Poultry of all kinds. Corned Beef, Pickled Pork, Pickled Tongue, all kinds. Bacon, Hams and Cottage Rolls. Bologna Sausages of all kinds. Wieners and Lard. Cheese, Creamery and Dairy Butter. Dill Pickles. Red Ribbon Cakes. Laymore Bone Meal. Casing of all kinds. The Best for Less. FOR DELIVERY, PHONE 46.

H. B. BJORK, - PROPRIETOR.

## THE STONY PLAIN BAKERY.

WHITE, RYE AND BROWN BREAD, FRESH EVERY DAY. 4 LOAVES 25c. PASTRY OF ALL KINDS.

PHILIP TRAPP, - Proprietor.

## BARGAINS ON PAINTS !

Now in the middle of the Painting Season, during the whole month of June, we are offering you Special Low prices on Four Lines of Paints, from a

**OIL SHINGLE STAIN, \$1.25 per gal.,** to a Truly First Grade Quality.

**HOUSE PAINT at \$2.25 per gallon.**

Made of Pure Linseed Oil, Lead and Zinc Pigments. GOOD SELECTION OF COLORS.

**Armbruster Lumber Co.**

### Students on Hike.

Students at the S. P. High had a very delightful hike on Thursday last; a stroll being made up the railway tracks west. Several miles out a halt was called, when the gents of the party kindled a fire and toasted canines were served, to the accompaniment of song and merry jest.

### Stony Plain and District

The A. E. Michael family have moved up to their Seba Beach cottage.

A party left on Sunday by Canadian Pacific Ry. for a visit with friends at Vancouver. Those in the party were: Mrs. Zucht Sr., Mr. and Mrs. O. Hoffman, Mr. and Mrs. Ed Hoffman. On their return, Mr. O. Hoffman leaves the party at Calgary, where he will take part in the Provincial rifle shoots on the ranges there.

Mr. H. Trapp is at present on a motor trip to Jasper Park.

Mr. Aleck Zeiler, who had been receiving treatment at Misericordia hospital, has recovered sufficiently to return home.

Mr. and Mrs. Malloch left on Saturday evening's train for a sojourn in the City of Quebec.

Mr. Wm. Comisarow, Viking, was a week-end visitor here, at the home of his parents.

Rev. Alfred E. Miller, pastor of Emmaus Lutheran church, Sexsmith, is spending a short vacation at his home in Stony Plain.

His friends here are expecting Mr. Christie to arrive back from his U.S. trip about Friday or Saturday.

Dr. and Mrs. Oatway left on Wednesday evening's train, for a visit with friends at Whitewater, Man., and Carlton Place, Ont.

The Co-op. Store got in a shipment of flour on Friday.

BUTTER AND EGGS WANTED at The Royal Cafe.

### Tennis Notes

Stony Plain Tennis club will hold its annual tournament during July. The draw for the ladies' and men's singles follows--

Ladies--1st round, M. Enders vs. L. Oppertshausser.

Gents--1st round, B. Downes vs. W. Oppertshausser.

Second Round--

Ladies: Mrs. Yeats vs. N. Kowensky.

Mrs. Ryan vs. B. Malloch.

S. Byrd vs. W. Oppertshausser.

Gents: B. Mundt vs. H. Bjork.

A. Miller vs. Marg. Gannon.

B. Oppertshausser vs. O. Kowensky.

M. McCulla vs. B. Wudel.

Ladies 2nd round to be completed by July 12.

Gents--

F. W. Yeats vs. P. Enders.

G. Barth vs. P. Comisarow.

S. Enders vs. A. Wudel.

S. Robertson vs. W. Oppertshausser.

H. Mortimer vs. W. Larson.

P. Gannon vs. H. Oatway.

O. Wudel vs. O. Oppertshausser.

M. Larson vs. H. Lewis.

Second Round in men's singles to be completed by Monday, July 9.

## HARDWICK'S

"Fresh from the Gardens"

## Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost inestimable benefit to Canada. Billions of dollars of American money have been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of peoples who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands, for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without incurring those conditions of the mind or of the body politic, which lead to war.

## Probe Working Of The Brain

### Use High Radio Currents To Stop Functioning Of Limited Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department.

Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of function is desired.

### Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband." Mrs. Northert V. Mueller could not be stopped by judge, attorneys or bailiff after she began a recital of her domestic affairs. The husband did not contest the action.

## Looseness Of The Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 38 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Modern War Implements

### Britain Installing Rapid Fire Gun In Fighting Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the hornets. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards." Presumably that gives British air fighters a fine start over all competitors in the armament race. But the presumption limps before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster.—Detroit News.

## Praises Missionary Efforts

### Doctor Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclere, South Africa, by Dr. J. R. Mott, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievement of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services has been immense. Women took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

## Fortune Has String Attached

### Man Must Marry By Christmas 1938 To Inherit

If John Francis Gallagher, of parts unknown, takes unto himself a wife on or before Dec. 25, 1938, and settles down to home life he will receive £100,000 from his aunt, Mrs. R. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Zarah to Acting Mayor J. A. McKenna of Winnipeg. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carleton, Alta., and general delivery, Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequest all her real and personal property to the church and charity.

## Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he saved the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

When you smoke plug tobacco, you can cut each pipeful fresh when you want it—and you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

## Regular White Elephant

### Automatic Gave Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Trader, with a .45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oklahoma.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr. Moffatt threw up his hands. "I am," he said with determination, "taking it to the nearest police station."

## Fixed Price For Tobacco Growers

### Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada Ltd., states that "The Ontario fixed price tobacco growers are now practically assured for 1934 a price based on 27c per lb. for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed, to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

## Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

## Population Of India

### Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world, more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated. The census of 1931 gave India a population of 353 millions or an increase since 1921 of just under 34 millions. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesman.

## A Miracle Of Speed

### Nineteen Girls In London Factory Make Shirt In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another button-holes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

"Minnow" submarines weighing only 12 tons and measuring 29 feet in length have been given successful undersea tests in Japan.

W. W. N. U. 2053

## Large Volume Of New Wealth Is Brought To Canada Annually By Tourists From Other Countries

In initiating measures looking to the stimulation of tourist traffic the Senate gives further evidence of its determination to make good use of seasonal time.

The proposal advanced by Senator W. H. Dennis, of Halifax, that there should be federal co-operation with the present promotion agencies commended itself to both party leaders, and to his fellow members generally.

The volume of the new wealth that is brought to Canada annually by its touring visitors was shown by several of the speakers to reach impressive totals, exceeding the net values of many of the larger native industries.

Systems of public highways have been constructed at great expense, Senator Dennis pointed out, and they should be utilized to the best advantage of the country. Certainly the extension of good roads into districts which only a few years ago were considered remote should add substantially to the attractions offered by the Dominion. Large new areas of varied charm and interest have become easy of access.

There is force and logic also, in the suggestion that fresh efforts should be made to promote the idea of "See Canada First" among our own people. As Senator Meighen observed, more Canadians are travelling in the United States than Americans travelling in Canada, although there was no question of the superiority of the Dominion's attractions. A "favorable balance" of tourist trade is not a mere paper balance. It is "cash in hand."

Strange twists and turns in international exchange values of the world have influenced profoundly the tourist movements of recent years. The flow from this continent to the Old World has dwindled since the pre-depression days. A strange turn in the tide was marked by the arrival in New York of a liner carrying 12 "dollar tourists" from Europe. The visitors, who include Belgians, Germans and French, are permitted five days of "rubber-necking" in New York by the special-rate arrangement.

Canada's "pool" train plan has provided low-cost facilities for travel within the country. Is it possible that the transoceanic excursion will make itself widely popular as an inexpensive means of sightseeing? The new flow Americanward from Europe is ascribed to the decline of the dollar abroad. If there is to be an era of mass travel Canada should claim its share of it.

The personnel of the committee appointed by the senate to investigate and report is representative of both east and west. Its finding should be helpful generally to the provincial and local agencies of promotion now operating.—Toronto Globe.

### Find Grain Growing Expensive

#### Europe May Decide In Time To Buy Canadian Wheat

Jackson Dodds, joint general manager of the Bank of Montreal and president of the Canadian Bankers' Association, was a guest of honor at the Canada Club while on a visit to the Old Land. During his remarks he pointed out that the production of wheat in Europe is on an uneconomical basis, and prophesied that with the return of more normal times various nations are likely to conclude that the purchase of that cereal from this country and other grain growing lands, is the most sensible and cheaper plan. It is to be sincerely hoped that his prognostication comes true.—Branford Ekspöator.

#### Fast Fire Engine

What is believed to be the fastest fire engine in the world has just been installed at the race track in Brooklands, England. It can attain a speed of more than 100 miles an hour. In recent tests it was demonstrated that the engine can reach any part of the two-and-three-quarter-mile circuit within one and a half minutes.

### New Type Of Plane

#### Will Be Propelled With Paddle Wheels In Prediction

Aeroplane having neither wings nor screw, propellers were pictured to the American Association, Society of Mechanical Engineers, at Berkeley, California, as the possible aerial craft of to-morrow, by M. K. Kirksten, professor of aeronautical engineering at the University of Washington.

Professor Kirksten outlined the essential feature of this new type aircraft as resembling nothing so much as the time-tested ferry boat propelled with paddle wheels. Air instead of water would be the ocean.

By Ruth Rogers

300  
SMART NEW VERSION POPULAR  
SHIRTWAIST DRESS YOU'LL  
LIKE ITS CHARMING  
YOUTHFULNESS

This jaunty model can be carried out in cottons, linens, tub silks or lightweight woollens. A plique in white with brown novelty striping is very effective, and incidentally very chic. Make the gumpie of white or of brown crisp organdie. Another interesting scheme is nautical blue linen with white linen gumpie.

In horseblanket check in gabardine, it's very sporty and ultra-new. Shirting cottons and seersuckers are also sportive.

For town or office, choose a cool tub silk print and make various gumpies—one of net, another of plain toning or of white silk and possibly a third of organdie.

Style No. 900 is designed for sizes 12, 14, 16, 18 and 20 years. Size 16 requires 2½ yards of 39-inch material for the jumper dress; and 1½ yards of 39-inch material for the blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Crested Wheat Grass

#### Supply Of Seed Falls Far Short Of The Demand

In spite of the fact that there is considerable wheat grass seed being produced in Western Canada, the supply is still far short of the demand. This is due in part to severe drought which has visited the prairie sections of Saskatchewan and Alberta during the last few years, since crested wheat grass has had its widest distribution in that area. These conditions have demonstrated its exceptional drought resistance and ability to produce in a dry climate, but while the plants were able to make substantial growth on available spring moisture and to produce heads, the supply of moisture was frequently insufficient to fill the seed.

Demand for seed of the "Fairway" strain is most insistent. Seed distribution of this variety has been quite general so that, although both ordinary crested wheat and the "Fairway" variety have grown in the semi-arid sections of the south, the latter has been grown almost exclusively in the northern districts, and these have been more favourably situated with regard to moisture. Good seed crops have been obtained therefore of "Fairway" crested wheat grass and the seed has been sold at a considerable premium over ordinary seed. For these reasons it would appear that seed stocks produced in Western Canada will soon consist largely of the improved variety.—Crested Wheat Grass Bulletin, Dominion Department of Agriculture.

### Danger From Hopper Poisons

#### Careless Handling Results In The Loss Of Livestock

Careless handling of grasshopper poisons has caused the death of a number of animals in the Saskatchewan district and constitutes a serious danger to human beings. Dr. Norman Wright, veterinarian, warns. Five cattle, four horses and a dog have died during the past few weeks within ten miles of the city of Saskatoon from this cause.

Showing the risk some people take, Dr. Wright points out that he saw a farmer driving out of the city with a wagon containing bags of flour and other groceries. Over the top of the wagon box were planks on which the farmer had thrown some bags of the wet poisoned bran. The water from these was dripping down on the flour. In the case of the dog, the farmer was spreading the poison from the back of his wagon by means of a fanning mill. The dog ran behind the wagon and was poisoned. The cattle were poisoned by bait which dribbled on a roadway from a burst bag and the horses received fatal doses by eating lumps of poison judiciously spread by farmers for grasshoppers.

### HUGE TELESCOPE DONATED TO ROYAL OBSERVATORY

The new \$60,000 telescope recently presented to the Royal Observatory, Greenwich, is shown above being adjusted. It is the most powerful reflecting telescope ever installed at Greenwich and astronomers at the Observatory were so eager to bring it into immediate service that they were using it for several weeks before its formal presentation by the donor, Mr. W. J. Yapp.

## Increase Of Scientific Knowledge Will Be Important Factor In Stimulation Of World Recovery

The whole world is now absorbed in a study of social problems. The ultimate aim of all industry, science, government and sociology is for a better life—better living conditions; better health; better food; better government; better houses; in fact, for better everything.

It is my impression that the immediate future will bring a great change in our mental attitudes toward the physical world, that it will bring into existence new pieces of information which will completely change our scientific viewpoint. It is not what we know that is so important. It is what we do not know. Most of what we know can be found in libraries, in the minds of people and in processes as they exist to-day. But we have no conception of what a sample percentage this is to what there is yet to know.

As an illustration, we perhaps do not recognize it, but everything that ever moved on the earth has been moved by energy which came directly from the sun. Our coal and oil deposits, our forests, our crops and everything that lives on the earth is simply an energy contribution from the sun. We do not know, except in a very superficial way, how the energy which is given out by the sun is transmitted to the earth. We do not know how plants pick up this energy and convert the inanimate carbon dioxide and water into the vital materials, so necessary for our existence. This, when understood, will open up an entirely new conception of things that can be done.

It is not difficult with this information in hand to predict the propulsion of airplanes by radiant energy with the power plants located on the ground. Nor is it difficult to envisage the entire system of aerial navigation which would be unaffected by fog and general weather conditions.

So much of our information to-day does not consist of basic understanding. It is known to us only by definitions. We say we can see through a pane of glass because it is transparent, and yet we do not know the first principle of how light is transmitted through glass. We say a copper wire is a conductor of electricity and yet even our best scientists do not know, even in a small way, how electricity passes through one. We rub our hands together; we say they are warmed by friction, and yet we have no knowledge to-day of the magnetism of friction. We know we have ball bearings, but as to the exact action of lubrication little, if any,

thing is known, and in the commonplace things that are used in the electrical industry, such as magnetism, electric charges, etc., we have only a very superficial knowledge. We know these things exist, however, because we can see their effects.

Each year we discover new things, which a short time ago we did not even know existed. I cannot help feeling that in a very short time we are going to break loose another great piece of basic information which will keep us industrially busy for a great many years to come. I think if we write down as our immediate problem those things with which we are dissatisfied we have a long list of things to do. We can make our cities less noisy; we can take dirt out of the air; we are air-conditioning our houses; we can have television and an unapproached number of other things.

There are many people who doubt if human progress can continue on its present standards. Still others think that we have to go back to lower standards of living because they see no way out of our present difficulty. There are, however, a substantial number who, knowing something of the development of civilization, do not regard the evidence presented as justifying either a static or a retrograding standard of living. Many of us do not believe the world is finished, or that we must curtail human effort and desire. We do believe that the way out of our present difficulty is forward and not backward. Our civilization as a whole is new. It is itself an experiment and just because we have encountered difficulty is no cause for despair. We must find out what is wrong and then remedy it, but we must not give up hope of a better and more secure life.—Charles F. Kettering, Vice-President in Charge of Research, General Motors Corporation.

### World's Sheep And Wool Situation

#### Industry Benefited By Improvement In The Demand For Wool

Canada, of course, is not a competitor in the world's mutton trade, says the 14th Annual Market Review of the livestock and meat trade, published by the Dominion Department of Agriculture. At the same time Canada is a factor to the extent that any changes for better or worse are reflected in the Canadian market. In so far as wool is concerned, Canada is a real factor in the trade as a whole, and the industry has been particularly marked by the recent improvement in the consumption of wool. Favourable lambing seasons in the world's major mutton and wool producing countries promise an appreciable increase in output during the ensuing season. Conditions are particularly favourable in Australia and New Zealand. Improvement in the wool market has been almost spectacular and promises to continue. The advance in values at wool sales early in 1934, added to the improvement in growers' returns from the industry and the appreciation in price combined with more favourable seasons, have brightened the situation most remarkably.

### Dangerous To Reduce

#### Women Who Fast For Sale Of Slender Figure Are Taking Risks

Women who fast or starve themselves for the sake of a slender figure do so at a greater risk to their health than do men undergoing similar deprivations, the American Association for the Advancement of Science was told by Prof. H. J. Deuel, of the University of Southern California Medical school.

"Women develop a much more pronounced acidosis during a week's fasting than do men," Prof. Deuel said. "This condition is associated with the inability of females to lose fat during starvation as completely as the male subjects are able to do."

Two William III silver forks were sold recently in London for \$275.

## WORLD HAPPENINGS BRIEFLY TOLD

New motor cars on the roads of the United Kingdom in March numbered 43,735 as compared with 33,746 in March, 1933.

Charles S. Thomas, 84, who capped a stormy career as United States senator and governor of Colorado by defying President Roosevelt's 1933 order against gold hoarding, is dead.

Canada's greetings were extended to the Prince of Wales on the occasion of his birthday, June 23, by the Governor-General, the Earl of Bessborough.

Henry Lawson Royle, 16, attempting his first night, at Hebray airport, Yorkshire, crashed and was burned to death 10 minutes after the take-off.

Dr. Wm. Boyd, professor of pathology in Manitoba Medical College, has accepted a similar position in Stanford University, California. It was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture estimated that the drought will cause European wheat harvest this year to fall short of 1933 by 260,000,000 bushels. The 1934 crop is expected to total 1,470,000,000 bushels.

Rt. Rev. Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London, that Great Britain should disarm even though she is alone among powers in doing so. Any alternative, he argued, might lead to war.

The Rotarians, 10,000 of them, were welcomed to Detroit. Representing 80 nations and nearly as many languages and political philosophies, they assembled for the 29th convention of Rotary international.

Nowak Krasinski, Polish newspaperman, who left Warsaw many years ago to get material for a book, has arrived at Cape Town after peddling across Europe and down the length of Africa on a bicycle.

## SUNDAY SCHOOL LESSON

JULY 8

### ASA RELIES ON GOD

Golden Text: "The Lord is my helper; I will not fear: What shall man do unto me?" Hebrews 13:6.

Lesson: II. Chronicles, Chapters 14-16.

Devotional Reading: Psalm 21:5.

### Explanations And Comments

The Prophet Azariah's Counsel, 2 Ch. 15:1-7. The Spirit of God came upon the prophet Azariah, the son of Oded. In Old Testament times the word spirit refers to God's power. As Azariah, the king of Judah, was returning victorious from his engagement with Zerah, the Edomite (14:13-15), Azariah went out to meet him. Instead of greeting him with words of congratulation and praise, Azariah solemnly warned him that he must remain loyal to God. "Hear ye me, Asa," he said, "and all Judah and Benjamin (the tribes over which Asa was king): Jehovah is with you, while ye are with him; and if we seek him he will be found of you; but if ye forsake him, he will forsake you." "He told them plainly upon what terms they stood with God. Let them not think that, having obtained the victory, all was their own forever; nor he must let them know they were under their good behavior. Let them do well, and it will be well with them, otherwise not" (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 28:9.

Asa's Reform, 15:3. Encouraged by Azariah's words (probably the words (Azariah the son of Oded) have dropped out of the text in copying, or Oded is a mistake for Azariah), Asa put away the abominations, destroyed the idols, and did away with the degrading heathen rites, out of all the land of Judah and Benjamin and out of the cities which is father Abijah had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Maachah, the queen mother, had erected an image of Astarte in Jerusalem. Asa had the image ground to dust and buried in the Valley of the Kidron, and he deposed the queen. Asa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

## ASSISTING NATURE

By JACK MINER

During the past year I have read a number of articles, both in magazines in newspapers, as well as many letters that have come to me, on the subject "Nature Balance", deriding actions or systems on the part of man which the writers described as "interfering with Nature", "upsetting Nature's balance", and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything—everything and then He created man. "In His own likeness and gave him dominion over all"; that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the livestock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave them the original stock, and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on the earth a long time, of course; but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the horse, different strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern United States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has developed a mule. But the mule kicked and, so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds—Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on—some of which are especially valuable as layers, and others as food. Our much-prized turkey is nothing more

nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North-west was grazed by millions of wild buffalo (Bos bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction, slaughtered the great roaming herds and, turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and stately governmental buildings dotted here and there across its vast expanse. Remember, though, that in order to bring about this state of things, man had to "interfere with Nature" as some would call it.

And speaking of wheat-field, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses—it had to be planted in the fall and did not always survive the severity of the Western winter; it was not producing as abundantly as seemed most desirable; it did not mature rapidly enough always to escape the early autumn frosts. Then came to our aid such men as Professor Charles Saunders, cerealist of Ottawa, and by study, experimentation and the rigid selection of choice grains, developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature within a certain period of time, and that yet retained all its former qualities. We have today the Marquis and the Garnet, other species of wheat, developed by man. God created the original, the germ; but man was given—and has used—the power to develop, manage and control it.

Or if you will consider your flower garden, look at the iris. God gave to us in America a little, insignificant flower growing along the banks of streams which we called "commonly the flag". From it man has developed irises that grow three or four feet in height, varied in color, and some giving out an exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty rose? He gave man brains, and a little old wild rose which served as the germ, so to speak. To-day, through the efforts of outstanding botanists, man has been given flowers of beauty and fragrance, as the Creator intended should be done.

But let us look at another side to the question: At the same time that God created the little wild rose, He created also the weed typical of which is the Canadian thistle. Still He gave to man the brains and the means of controlling these also, so that they may be restrained from predominating in the plant world.

In your orchard are many varieties of fruit. Did God create the Stark Delicious apple, the Northern Spy and other varieties? No. He gave man the little wild crab, and the hawthorne, which is a miniature apple or germ, and from these man developed what we have to-day. Yet, according to some people's statements, if you kill the mice that gnaw these fruit trees when they are small, you are "interfering with, or upsetting, Nature's balance."

If you are raising poultry, or other bird life, and hawks begin to destroy and live on the birds, and you fail to take a gun and shoot the hawks, then you are not using the brains God gave you.

If your clothing were to become infested with vermin or your dwelling with rodents you would destroy the insects or animals that were troubling you. Yet (if they were consistent in their argument) these people would have to maintain that in doing so you were "upsetting Nature's balance, since God created all these creatures at the same time. Or how about the fly, carrier of typhoid? Do you control it, or, preferring not to disturb "Nature's own", let it live? Personally, I am glad He gave man "dominion over all" these things.

Indeed, one is moved to ask the question: What would our animal world, our farms and orchards and gardens be like if—be like if man had not assisted Nature? Yet the very minute the white man discovered this continent, came ashore, and began to develop, he began to develop North America into a garden for hundreds of millions of people, that man, according to some, disturbed the balance of Nature.

As for me, I thank God for all He made man of. He made man with which to work: that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created. To illustrate my meaning, allow me to quote the poem, "Making a Garden", written by Ida M. Thomas:

Man ploughs and plants and digs and weeds,  
He works with hoe and spade;  
God sends the sun and rain and air,  
And sends the garden's seed.  
He must be proud who tills the soil  
And turns the heavy mold:  
How wonderful a thing to be  
In partnership with God!

I say, He wants all of us to be partners.

### Never Shows Correct Time

Silesian City Clock Has Been Fast For 650 Years

Geologists make a distinction which is probably unique. A clock in this ancient Silesian city has not shown correct time for over 650 years. In 1363 a conspiracy was formed to murder the councillors as they left the town hall at noon. Conscience, however, overtook one of the conspirators, and he put the clock forward seven minutes. As a result, the would-be assassins arrived on the scene too early and were arrested by the watch. To-day the clock is still kept seven minutes fast in memory of the councillors' escape.

## Little Journeys In Ice Age

THE ICE AGES

(By Gordon H. Guest, M.A.)

Niagara Falls and the Great Lakes, vacation paradise to many from the western plains, are legacies left to us from the last great ice age, which enveloped this continent many thousands of years ago. Once looked upon as great catastrophes because they destroyed life and defaced the earth's surface, the ice ages are now considered by geologists to have been not entirely destructive.

It is thought that there have been four "ages of ice" in the geological history of the world, each lasting for many thousands of years, and bringing about great changes in the earth's surface. The last ice age is believed to have covered about 12,000,000 square miles, and of this, 6,000,000 square miles is still under ice. It is notable, however, that the world was never entirely covered with ice at one time, and thus life was always preserved, to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice encroasts large areas of the earth's surface and all forms of life in these regions become extinct. The condition is brought about by "ice caps," huge blocks of ice formed by piles of snow which partially melt, congealing to form ice, and slowly spreading farther and farther.

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

A woman's intuition is more powerful than a man's knowledge.

## BRITAIN WILL NOT PAY WAR DEBT TO U.S. IN GOODS

Washington.—A British reply that Great Britain is not prepared to make partial payment of its debt in goods and services was received by the state department without comment.

The formal note, delivered to the state department by D. G. Osborne, charge d'affaires, rejected overtures made by Secretary Cordell Hull in a note of June 12.

The British note said the experience of German reparations had shown that transfer of goods was as unsatisfactory to world economic affairs as transfers in cash and could not be entertained by Great Britain.

The British note emphasized that the primary question for settlement was the amount that should be paid.

Secretary Hull's note of June 12, after setting forth the American position in opposition to British reasons for failing to pay on June 1, explained that Great Britain had never made any suggestions for payment in kind and hinted that such payments might open an avenue for settlements.

The text of the British debt note follows.

After careful consideration of the note which you addressed to Sir Ronald Lindsay on June 12, His Majesty's government in the United Kingdom feels there are two questions to which it may be useful to make further reference.

In the first place, His Majesty's government would observe that in their note of June 4 they did not state payment of the British war debt was legally contingent upon payment of the debts due to them. What they said was that it would be impossible for them to contemplate a situation in which they would be called on to honor in full their war obligations to others, while continuing to suspend all demands for payment of the war obligations due to them. This was a statement not of law but of fact.

Secondly, as regards the suggested payments in kind, His Majesty's government would recall that the experience of German reparations showed that transfer difficulties are not solved by a system of deliveries in kind.

As the committee, presided over by General Dawes, pointed out in 1924: "In their financial effect, deliveries in kind are not really distinguishable from cash payment."

In fact, economic objections to cash payments would apply with equal force to deliveries in kind, unless those deliveries were to consist of indigenous products of the debtor country (excluding re-exports) and unless they were to be accepted by the creditor country and consumed by it in addition to the goods taken from the debtor country in the normal course of trade.

If the United Kingdom were not to receive payment for goods exported on commercial accounts, her exchange resources available to purchase cotton and other goods from America would be still further diminished. Therefore, while not unwilling to give further consideration to possibilities in this direction, His Majesty's government do not at the present see any method of putting such a plan into practice which would be likely to commend itself to the government of the United States of America.

In the view of His Majesty's government, the primary question for settlement is the amount that should be paid, having regard to all the circumstances of the debts.

They regret that up to the present it has not been possible to make further progress in this matter but they will welcome the opportunity of resuming discussion whenever it may appear that present abnormal conditions have so far passed away—as to offer favorable prospects for a settlement. They are always anxious to remove from the sphere of controversy all or any matters which might disturb the harmonious relations between the two countries.

W. N. U. 2093

## New Franchise Act

B.C. Doukhobors Will Be Debarred From Voting

Ottawa.—Rapid progress was made on the new franchise act as the committee of the house considering the bill approved without division three amendments at a second sitting under the chairmanship of Hon. Hugh Guthrie, minister of justice.

Doukhobors in British Columbia, where they are discharging their voting in provincial elections under the British Columbia law, will not have the right to vote in Dominion elections under one amendment.

A second amendment struck out the provisions for a signed application by a prospective voter insofar as the original basic list is concerned. The provision for signatures will continue to apply to the annual revisions of the list.

A third amendment dealt with the appointment of enumerators in each riding. It provided one enumerator should be nominated by the sitting member of parliament for the constituency. The second enumerator will be nominated by the nearest opponent to the successful candidate in the last general elections.

A. W. Neil (Ind., Comox, Alberni) appeared to ask that provision be made for the taking of the absentee vote as under the British Columbia Elections Act.

## Takes Tea With Queen Mary

Mother Of President Of United States Entertained At Buckingham Palace

London.—Two of the world's most talked about women—Queen Mary and Mrs. Sandro Delano Roosevelt—sipped tea together in Her Majesty's private apartments at Buckingham Palace.

King George was present, but most of the animated conversation was carried on by Her Majesty and the mother of the United States president.

Just two mothers—grandmothers in fact—found many common interests as they chatted. Their majesties were impressed by the gaiety, friendliness and frankness of Mrs. Roosevelt.

## High Price For Telephone

Mukden, Manchuria.—Telephones are so scarce and hard to get in Mukden, because of the growth of the city, that fabulous prices are being paid for telephones being relinquished by established subscribers. A Japanese building contractor has just paid the record price for a telephone connection—1,250 yen. This is equal to nearly \$400 in Canadian money.

## Casualties At Rodeo

London.—The score of Tex Austin's rodeo to date is five contestants injured and one steer allegedly terrified. Rusty Coram, famous broncho buster of Camargo, Okla., suffered a broken leg when a bucking horse fell on him. He was taken to a hospital, the fifth cowboy injured since the rodeo began two weeks ago.

## Trade With Great Britain

Toronto.—"We intend to establish close trade relationship with Great Britain and all other countries," Hon. Henry T. Rainey, speaker of the house of representatives of the United States, declared here.

## MAY COME TO CANADA

The health of Premier Ramsay MacDonald is the chief concern of the people of the Mother Country at the present time, as his physicians demand that he take a rest. Mr. MacDonald must take at least three months' rest, and it is thought he may make a trip across Canada.

## Farm Debt Adjustment

Senate Frowns On Bill And Carries Amendment

Ottawa.—Provision in the government's farm debt adjustment legislation whereby a mortgage costing a farmer in excess of seven per cent. may be liquidated on payment of the principal and three months' interest unless the mortgagor desires to continue it at a rate of five per cent., was frowned upon by the senate banking and commerce committee.

It was held this would make it impossible for farmers to secure mortgages. An amendment was carried unanimously making it possible for the mortgagor to hold his contract, when so challenged, by reducing the rate to seven per cent.

The committee proposed only one other amendment.—A provision that would allow the governor-in-council to appoint an official receiver only in such counties as would be deemed necessary and expedient.

The bill was reported for third reading as amended.

## Defeat Divorce Bill

Ottawa.—The Stotland divorce bill will not receive further consideration by the House of Commons this session. A motion by E. R. E. Chevier, Liberal member for Ottawa, to have the bill which was defeated in the private bills committee, restored to the order paper, was declared lost. By the bill, Hyman Stotland, of Montreal, sought to obtain a divorce from his wife, Ruth Rudnikoff Stotland.

## Tax Will Be Collected

Ottawa.—Provisions for the collection of five per cent. income tax from private trusts set up in Canada for the benefit of non-residents were placed in the amendments to the Income War Tax Act which were finally passed through the House of Commons. All clauses in the income tax measure had been passed previously but some question arose over the taxation of these private trusts.

## To Visit Dominion

Reported That Ramsay MacDonald Will Holiday In Rocky Mountains

London.—The Daily Herald states that Prime Minister Ramsay MacDonald has "practically decided" to spend his long vacation from official duties in Canada, indulging in a walking trip through the Rockies.

A projected trip up the Amazon river in Brazil was rejected, the Daily Herald said, on account of the intense heat. Friends of the prime minister looked with disfavor upon his suggestion of spending the three-months health-seeking vacation in Newfoundland.

Internal politics in Newfoundland might worry the work-worn premier, it was feared. The newspaper reported that a long sea cruise was rejected on the grounds Mr. MacDonald would spend much of his time reading. He has suffered a great deal from eye strain during the last few years.

The visit to the Canadian west was finally proposed as affording the best possible rest for the premier. It was not stated who would accompany Mr. MacDonald but his daughter Isabel was believed almost certain to go with him. She has accompanied her father on all his trips away from England.

## Investigation To Continue

Probe Into Price Spreads Will Be Carried On

Ottawa.—The price spreads and mass buying probe will be continued during the summer, it has been learned definitely.

The committee of 11 members of parliament conducting an inquiry since the middle of February is expected to be turned into a commission to continue the investigation.

In a brief report being prepared for tabling in the House of Commons, this recommendation for the set-up of a commission is made. No other major recommendation is likely to be made in the present report.

Practically all the sittings of the commission will be held in Ottawa, although there is a possibility the body may visit the maritime provinces late in August to hear evidence on the fishing industry on the Atlantic.

## Relief Cheques

Payment Of Dominion's One-Third Proportion Is Authorized

Ottawa.—Cheques in varying amounts from less than \$100 to \$337,231 as the Dominion's one-third proportion of provincial relief operations, were authorized by order-in-council tabled in the House of Commons. The amounts authorized included:

Alberta—\$77,681.  
British Columbia—\$207.  
Manitoba—\$3,672.  
Saskatchewan—\$44,514, municipal and direct relief expenditures under 1933 act, to be credited to the \$500,000 loan made by the Dominion to Saskatchewan, November 24, 1933.  
For provincial works under 1933 act—\$1,066.  
Municipal direct relief under 1933 act—\$93,920.  
Municipal direct relief under the 1932 act—\$790, to be credited to the Dominion's loan of \$500,000 to Saskatchewan dated January 6, 1934.

## JAPANESE MOB MAKE ATTACK ON BRITISH POLICE

SHANGHAI.—An angry crowd of 300 Japanese attacked British police of the Shanghai international settlement before dawn, hurling bricks, bottles and clubs at them.

The affair threatened to precipitate an international incident. The British authorities had sought to arrest two Japanese sailors ashore in international territory.

The Japanese, styling themselves "patriots", objected to a British undertaking to arrest one of their countrymen and quickly assumed an ugly mood. Missiles began to fly.

Japanese naval shore patrols and British police reinforcements quickly ensued the affair which a time threatened to assume proportions of an armed clash.

High Japanese naval authorities and British international settlement police officers finally intervened to prevent a pitched battle, although numerous British policemen were struck by bricks and other weapons hurled by the Japanese.

The British policemen, who attempted the original arrest, claimed that two Japanese sailors struck a Chinese woman, making it necessary to take them into custody.

Japanese naval representatives insisted the police of Shanghai had no authority to arrest Japanese sailors. Police refused to accept the Japanese attitude, pointing out other nations maintaining naval or military forces here recognized police authority on shore. They pointed out that when called upon to handle any service man, they immediately hand him over to his own command following the arrest.

## Boys Start On Tour

Famous Kittilano Band Will Sail From Montreal For England

Vancouver.—Canada's champion junior band, the Kittilano Boys' Band, of Vancouver, has left here en route for a two-months tour of England before returning home. At least one of the 45 youthful musicians plans to remain in the Old Country if his hopes are realized.

Norman Pearson, tall, fair-haired, 18-year-old trombonist, who, besides winning many awards for his music has established himself as one of the Dominion's foremost cricketers, will attempt to realize his ambition when he reaches England—to play in first class county cricket there.

Pearson, despite his youth, has compiled a record in two months of play this season that is better than equalled in Dominion record books. During that time he knocked up five centuries, passed the two-century mark once, and scored a total of 1,023 runs. His high score was 271 runs. And to make his record even more remarkable, three scheduled games were rained out.

Concerts are being given en route at all the larger cities on the prairies and in eastern Canada.

The party will sail for England from Montreal on the Duchess of Athol.

## Loan For Winnipeg

Winnipeg.—Premier John Bracken announces arrangements have been made by the Manitoba government to loan the city of Winnipeg \$1,500,000 to cover the city's cost of unemployment relief during 1933. The loan was made possible by the Manitoba government borrowing from the Dominion government.

May Reduce Radio Licenses  
Toronto.—The Globe, in a special despatch from its Ottawa correspondent, said it understood proposals were before the special House of Commons commission on radio that might result in a reduction in the license fee for receiving set owners from \$2 to \$1.50 or \$1.

## Awarded Scholarship

Toronto.—Toronto University Alumni Federation has awarded Canadian General Hospital Scholarship in fertility medicine valued at \$250 to Bertman James Woods, of Lemberg, Sask.

## MACHINE GUNS SPRAY DEATH INTO THE RANKS OF HAVANA PARADEERS

Ten were killed and more than 20 wounded when machine gunners opened fire on a political parade of students in Havana, Cuba. This unusual picture shows the actual fighting shortly after the battle broke out. No. 1 designates the nest of machine gunners and the haven of some of the wounded. No. 2 is a man in the street. No. 3 shows some of the paradeers who have taken refuge behind a lamp post and are returning the fire of the attackers with their pistols. The cameraman risked his life to get this picture.

## The Duffield Picnic and Sports Day.

A splendid day and a record crowd at Duffield on Saturday last, made the annual sports day celebration, held on the Athletic club's new grounds, quite a success. Pony races, horseshoe pitching, baseball games, basketball and numerous other events helped make a busy sporting afternoon.

Stony's Walther Leaguers took a leading part in the baseball competition. In the first game W-Ls defeated the Keep Hills team 7-4. Beider warden pitched for the W-Ls and held Keep Hills down to only a few hits. Harry Staub caught for the W-Ls. Eddie Dodge and W Quigg pitched for Keep Hills. Andy Brass umpired.

## Base Ball Games.

A ball game worth watching was played here last week between a local team and the Rosenthal players. For the latter team Ed Kulak caught, and A Davies and J Kulak pitched. For the locals, Ed Enders, W Rosnau and Cl. Lory pitched; and Cl. Lory, Harry Staub and W Rosnau caught. There were several members on both teams who didn't get a chance to work-in on either batteries, as darkness came on. Incidentally, the score was: Locals 14, Rosenthal 5.

Stony's team won their ball game over Brightbank at the Lucknow Picnic on Friday by 12 to 11 runs.

Stony's team is billed for a match at Hansen's Corners on the 6th.

## An Election in the Offing.

Following on the close of the McMillan-Brownlee court case, in Edmonton, Saturday night, Premier Brownlee is said to have forwarded his resignation and that of his Cabinet to Lient, Governor Walsh. The UFA members of the House held a caucus in Edmonton on Tuesday.

## Stony Plain and District

Mr and Mrs L M Larson and Mr and Mrs H B Bjork attended the Dougart wedding dance at the Tioli, Tuesday night.

Miss Queenie Donaldson spent the week-end here at the home of her parents, and is now attending the Summer School now being held at the U. of A.

Mr Lorne Oatway is leaving town this night, to spend a vacation at Gull Lake resort.

A Conference of pastors and laymen of the Lutheran congregations (Missouri Synod) of Northern Alberta is being held at present here, in Stony Plain.

## Additional Sports Returns.

100 yards, Ladies, \$2, 50c  
Barbara Groat 1, M Gannon 2  
100 yards, Girls under 10 years, \$1, 50c  
May Shalen 1, Violet Kulak 2  
100 yds. Boys under 15 years, \$1, 50c  
Carl Zutz 1, Art Fialhaber 2  
Boys 10 and under—Walt Hoffman 1, Albert Miller 2  
Girls, 6 and under—Iris Kulak 1st, Jean Goebel 2.  
Best appearing team horses \$5 No entries.  
Slow Car Race \$2  
J Lutz and W C Williams tied.  
Horseshoe Contest—  
Won by C W Ilsen

## Brightbank Picnic.

The Brightbank picnic, held on Friday, the 29th, at the Lucknow School grounds was a big success, in spite of the bad roads. A large crowd attended.

Stony Plain took an active part in the sports: their baseball and basketball teams played the Brightbank teams.

The baseball game was won by Stony Plain by a score of 12 to 11. Ph. Enders pitched a very good game for Stony; but in the last inning his arm went bad and the Brightbank squad came close to trying up the score. Ed. Enders then stepped into the box and finished the game, Stony leading the Brightbank Nine by one run. L. Enders caught for Stony. Ken. Kreye pitched a very good game; but he couldn't check the hard hitting Stony boys. N. Kreye caught for Brightbank. Both teams had only a few errors. In the early part of the game, Brightbank was leading Stony 5-1, but by the end of the game the latter was leading and captured the \$2 prize.

The basketball game between the Stony Plain and the Brightbank girls, proved to be the best match these two teams ever played. The game, however, was foisted for rain before the end of the second quarter. The score was 15-14 for Brightbank. The game will be re-played at an early date to determine the winner of the \$2 prize.

The big dance that was held in the schoolhouse that evening was well attended.

## Hansen's Corners Picnic, July 6th.

## Spruce Grove News.

The following notice appears in the current number of Alberta Gazette: "Board of Public Utility Commissioners has authorized the Trustees of Spruce Grove Rural High School Dist. to borrow \$2500 for the purpose of erecting a one-story frame and stucco schoolhouse."

Mr H Brox took up a load of sports to the Duffield picnic on Saturday last.

The Grove's High School basketballers made a good showing at Stony's sports day, defeating the Brightbank and W-L teams. The team members: Agnes, Barbara, Chris, & Clare Groat; Clara & Frieda Goebel, Lydia Schutz.

The local agent for Woodland Dairy spent the holiday making 2 trips to the City with the lactical fluid.

A dance is billed for the Michael School house, Friday the 6th.

## Not Raising the Standard.

Leduo Representative: It cannot be said that Edmonton papers are raising the standard of Canadian journalism or serving any justifiable purpose by publishing that muck incidental to the MacMillan-Brownlee trial.

## Friendly Rivalry.

A unique event took place Saturday Evg. last in Hansen Corner's Community Hall. For some time past there has been a competition on between the 2 Locals there—the UFWA and UFA as to which could corral the largest number of new members within a given time. On checking over recently it was found that the ladies' local had won, and so the feeds were on the men. Invitations had been extended to some 200 to attend the banquet, but not all were able to attend. Mr Gust Erickson is the president of Hansen's local.

## Tractor Races

## To be Featured at Western Fairs Next Month.

Visitors to the Western Fairs and Exhibitions next month will have the unique experience of seeing farm tractors streak around the race track at mile-a-minute speeds. One of these tractors—the famous Allis-Chalmers No. 999, which holds the world's speed record for tractors, will be driven by Louis Meyer, famous racing driver, who will use the new low pressure Firestone Farm Tractor Tires. Meyer is the only man who has ever won three A.A.A. Championships and is one of the pair who have twice won the Indianapolis Speedway Race.

Since their introduction several years ago, pneumatic tires for tractors have met with great success. All equipment manufacturers have adopted them and tests show that tractors with these tires are able to do 37 p. c. more work with 24 p. c. savings in fuel while the tractor life is extended 33 p. c. and repairs reduced by 50 p. c.

## BYLAW No. 10.

The Council of the Municipal District of Ings No. 520, duly assembled, enacts as follows:

1—Any person committing a breach of any of the provisions of any of the Bylaws of the Municipal District of Ings No. 520, now in force, or which may hereafter come into force, shall on summary conviction thereof before a Police Magistrate or Justice of the Peace, forfeit and pay (except where other provision is specifically made therefor) a penalty not exceeding \$100.00 in addition to the costs of the conviction for each offence.

2—In default of immediate payment of any fine or penalty herein provided or specifically provided in any other bylaw or any penalty and license fee, where provision therefor is specifically made, and of the costs of conviction or of such penalty, license fee or costs, as the case may be, imposed by the convicting Justice, the same shall be recovered and enforced as by bylaw provided. DONE AND PASSED in Council this 22nd day of May, 1934.

Certified to be a true copy of Bylaw No. 10.  
Signed, R. C. HOWAT, Reeve.  
Signed, JOSEPH WEST, Sec. Treas.

## EUROPEAN WHEAT SITUATION

(Total Annual Average Production 1,440 million bushels)  
FOR each of the past two years the importing countries of Europe have enjoyed unusually high wheat yields per acre, due to very favorable climatic conditions. This year, it is estimated, they will have but a normal yield per acre, hence their combined production is expected to be about 250 million bushels less than last year. This situation should result in substantially increased shipments of wheat to Europe from exporting countries for the 1934-1935 season.

## ARGENTINE WHEAT SITUATION

(Average Annual Wheat Production 240 million bushels)

ARGENTINE farmers produce three important crops—Cattle, Wheat and Flax. Of late years much acreage formerly devoted to the production of Alfalfa, Grasses and Flax has been put into Wheat, due to the fact that the world depression has made it difficult for millions of families to purchase very much beef, and difficult even for people to afford to paint their houses and buildings.

As the world-wide recovery proceeds, however, unemployed will go back to work, wages fall will become larger and many will be able to afford more meat, and as well there will be an increase in demand for Flax to make linseed oil for the manufacture of paint. It is probable some acreage in the Argentine will be taken out of Wheat and be put into the more profitable production of Flax and Cattle.

## OCCASIONAL WIFE

By  
EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

### SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling photographer trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art to continue the family. Others in the story are Ava Werth, another wealthy girl who is going to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Ava and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. Camilla has gone from the studio. Ava Werth calls and persuades Peter to accept a loan of \$1,000. Camilla has his exhibit and asks Ava and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Ava "Inspiration." Peter adopts the latter title and Camilla heartily goes to Peter's studio for quiet and to think. Peter and Ava follow later, and as the lights are turned on, see the statue has been shattered to pieces. Ava accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

(Now Go On With The Story)

### CHAPTER L

Ava was one of the first visitors at the museum when the exhibit opened the following week. Her eager, anxious inspection of the vast gallery filled with sculptured pieces, might have indicated that she was one of the most ambitious of the entrants. Her eyes scanned one side of the room hurriedly, darted to the other end. Even in that brief interval of suspense, her heart sank heavily with the dread of disappointment, before her eyes found that object for which they were searching impatiently.

Yes, there it was. Peter's "Land of Hope" had made the exhibit. It had been accepted for display with the best by the selecting committee. She crossed the room quickly to examine the card which hung from the modelled group. The data was accurate. There would be another week of suspense before the final award of the scholarship prize. She must help Peter to endure it, somehow. Of course, she hadn't much hope now for Peter's chance of the reward. She was only happy for him that his piece had been accepted. That should encourage him.

W. N. U. 2003

Besides, she now had an alternative to her first plans involving his removal go Paris. How fortunate that she had thought of suggesting that Peter could do some work for her to meet his loan from her. Had she made the suggestion now, he might have suggested that her pity prompted the plan—*as it was*, she already had arranged for his services if he did not go to Paris.

The idea presented two advantages: instead of relieving him of his indebtedness to her, it would practically double his obligation to her, in the light of gratitude. Not only would Peter feel obligated to her for the timely loan of money, but for the opportunity to repay it with his own work. She also would see that enough admiring friends placed orders for his work, so she still held the advantage—even without Paris. That would be but a simple step when she had won Peter completely.

Paris, Rome, Athens—everything would be theirs to command, then. So engrossed was she in her plans that she almost collided with Peter in the corridor as she was leaving the exhibit room.

"Peter," she exclaimed, "it's in!" not even granting him the thrill of discovering it for himself.

"Is it?" the gleam which lighted his eyes betrayed his calm. "I'm surprised."

"Oh, I'm not. It is a marvelous thing, but I know."

"You might as well say it has no chance with the others." "Why, no," she denied. "Would you believe it, I have been in there for 10 minutes looking at that piece that I have seen dozens of times before, and I didn't even notice the other entries!"

He grinned boyishly. "You are prejudiced, madam. You would make a fine judge, now, wouldn't you? Come back with me, and we'll see what else there is to see."

As if she would refuse! She cared nothing about comparing the talents of his contemporaries, but just to walk beside Peter anywhere, to share anything with him, was sheer delight and an adventure.

She led him to his own work and he read with a strange rush of exultation the prosaic words of information on the classification card. Occasionally, it was not important; but to Peter it represented a goal toward which he had been striving for four long, arduous years. He had not intended that it would be just like this, but at least, his work had met with the approval of the judges well enough to be in the display. It was a small personal triumph which portended much more than appeared on the surface. He had not worked in vain.

For a moment he forgot that he was not alone, so far did he draw into his own secret thoughts. Ava, the room, and its other occupants, the scores of plastic figures all about him, receded into space; and he was alone with his little moment of personal triumph.

Camilla was the first to intrude into that sanctuary of his thoughts, and it was almost as if he would speak with her that he turned toward Ava. Thus abruptly returned to the time, place and reality, his face clouded for an instant, like the sun is dimmed by the sudden passing of a small white cloud.

His comment was changed to, "Well, it's there!" with a long sigh of near-satisfaction. "Now let's see what argues with it." His critical eyes roved over the room. "Shall we try to pick the winner?"

They roamed about the room, commenting, admiring, criticizing. Ava favored only the symbolic figures such as Peter had prepared to enter. But Peter admired an excellent bust of the city's leading citizen, Andrew Havelock.

"It's absolutely marvelous," he declared. "I've not only seen pictures of him, but I've seen Havelock himself, talked with him. It is the true likeness of a human being that I've ever seen in plaster." He turned around. "That sea gull with spread wings is a beauty, too; every line is rhythm and motion, but I doubt if it has a chance against this bust. I don't think there is a nude figure here that can compare with either of them."

"Then what about 'Land of Hope'?" she reminded him.

"Oh—that! It's completely out of the running. I am going back to work, in earnest. At least, this much has inspired me. By the way are you in any hurry for your stuff?"

"Not if you have something more important to do. I can wait."

"Not at all. I just want to know where to begin. I'm at your service, if you say so."

"I do say so," she declared. "How about coming to tea at the house tomorrow and consulting with mother about the garden piece first. You can get them modeled and while doing the stone work you can fill in on my things at the studio."

"Fine," he agreed. "You're a great planner, aren't you?"

"Plans are only great if they work out to the proper advantage."

"And what is that advantage?"

"Your success. It all depends on you," she replied, with more significance than he knew.

"That suits me."

"They were standing outside now, beside her smart coupe, parked at the curb. "I'll drop you at the studio," she suggested.

"Thanks a lot. But I'd rather walk, to help work off some of this newly acquired enthusiasm. Too much at one time is bad for the mental balance. Did you ever feel giddy with inspiration? Well, that is my present condition," he grinned. "Besides, I want to drop in somewhere right away and phone Camilla the good news. She will be anxious to hear. I promised to let her know as soon as possible."

Ava set her teeth hard over his loyalty to Camilla. It had not been since that first moment on the night of the tragedy. Nor had she dared mention to him the incident, even to learn what his reactions had been, or what they had said to each other. There are some forbidden places into which even the most audacious and unscrupulous may not enter. She would just have to be patient and await the outcome. Her campaign was now prolonged and confronted with added difficulties. But she was a good warrior who never admitted defeat.

"Well, so long," she waved gayly, and darted away with a roar of the powerful motor.

Camilla was jubilant over Peter's announcement. "I knew it would get it," she told him. "Congratulations, darling. I have a little special dinner all prepared to celebrate tonight. Be there at six, will you?"

"Okay, sweetheart. But you took a pretty long chance getting that celebration ready before the victory, didn't you?"

"I disagree. It was a sure thing. But even so, a celebration was in order. It is quite an event to have you for a dinner guest, even."

He laughed. "You won't think it's an event when you have to face me across the dinner table every day for the rest of your life," he warned.

"It won't be. It will be paradise," she declared.

(To Be Continued)

## Another Useless Invention

Cellophane Lining For Bathtub To Eliminate Rings

"No more rings around the family bathtub."

This is the promise held out by Robert I. Innis, Long Wharf, ship handicapper of having a crippled arm, has patented an invention which should do much in the way of preventing domestic discord arising from those rings which add nothing to a bathtub's beauty.

The invention consists of a specially treated waterproof cellophane lining which can be instantly loosened from the inside of the bathtub by means of a rig-cord when the bather is through.

## Ask Mother— She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown. It kept her on the job all through the change. No wonder she recommends it.

VEGETABLE COMPOUND**

## China's Adverse Trade

Great Outcry Is Made Against Use Of Imported Goods

In view of the fact China's adverse balance of trade this year promises to run to at least \$700,000,000, there is a great outcry in the country against use of imported articles of all kinds.

It is admitted foreign goods and foreign cotton must be imported as necessities, but other foreign-made things, from automobiles to chewing gum, are now being denounced as "useless luxuries" by the Chinese language press. Incidentally, China imported \$2,000,000,000 worth of chewing gum last year, and the patriotic newspapers say most of it was consumed by young Chinese women who are dance-mad.

Joining the present campaign against use of foreign-made goods, many organizations are passing resolutions pledging all members to use only Chinese-made products. The entire staff of the ministry of railways at Hankow, for instance, has sworn a solemn oath to wear nothing not made of native materials.

Chinese women are objects of particular attack in this campaign against foreign goods. The women of the treaty ports, and those who adopt a semi-foreign mode of life and dress, are being particularly denounced as unpatriotic.

## Sink Great Shaft

Would Bore Deep Hole In Earth To Top Unlimited Power

The boring of a great hole into the earth, with all mankind lending a hand to the job, was suggested before the American Association for the Advancement of Science in a paper prepared by the late Dr. C. E. Grunsky, president of the California Academy of Sciences.

The paper was read by Dr. F. N. McFarland, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 8.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit, the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gaseous pressures of 900,000 pounds a square inch would be the reward.

Dr. Grunsky did not conceive that man could burrow down very closely to the central core of the globe but suggested a great co-operative effort would result in penetrating the outer crusts to a vastly greater depth than ever before—depths he thinks could be reached which would tell science many valuable things.

## THE RHYMING OPTIMIST

By Aline Michaelis

### TWO YEARS OLD

With eyes like heaven  
And hair of gold,  
This joy is given,  
Now two years old!

When have we caught this  
Flower, this song?  
Who would have thought bliss  
Could last so long?

Here is beguiling,  
Embodied mirth,  
Like April smiling,  
No taint of earth!

This trust is given  
For us to hold:  
Eyes dark as heaven,  
Heart pure as gold!

From 678 replies from representative farmers in the three Prairie Provinces, it would appear that the averages of the longest lived articles of farm machinery were the wagon (average 20.1 years) and the packer or roller (20 years). The plough-plowing (19.4 years) came next, followed by the sleigh (18.5); the ladder (18.1); spike-tooth harrow (18.0); hayfork (17.4); potato digger (17.3); hayrack (17.2); and corn cultivator (17.1). The shortest lived were the tractor (11.4); automobile (9.6); motor truck (8.9); and the hayrack (7.3 years).

Portable searchlights for fire fighting are being used in the Berlin fire department.

## Little Helps For This Week

"I would have you without carefulness." I. Corinthians 13:2.

O Lord, how happy should we be if we could cast our care on Thee, if we from self could rest; And feel at heart that One above, In perfect wisdom, perfect love, Is working for the best.

Cast all they care on God. See that all they care be such as thou canst cast on God, and then hold none back. Never brood over thyself, never fret thyself, but cast everything, even this very care which distresseth thee upon God. Be not anxious about little things if thou wouldst learn to trust Him with thine all. Act upon faith in little things. Commit thy daily cares and anxieties to Him, and He will strengthen thy faith for greater trials. Rather give thyself into God's hands, and so trust Him to take care of thee in all lesser things as being His, for His own sake, whoso thou art.—E. B. Pusey.

## Seems To Be Unwise

Manchester Guardian Comments On World Destruction Of Food

In any case, to an economist from some other world, the whole wave of restriction—that is the deliberate destruction of food and raw materials—whether under the direction of Mr. Bruce or of Mr. Elliot or of Mr. Roosevelt, would appear fantastic. In nearly every country during the past few years, in the name of gold reserves or balanced budgets, the standard of living of the mass of the people has been steadily forced down. Even in the pre-quota era in Great Britain signs of malnutrition among children were not lacking. Do we then encourage the farmers of the North West to send us cheap bread, butter, and meat? No; we invite them to destroy it. The word has gone forth that cheap food is a curse.—Manchester Guardian.

## Strange Dictionary

Smithsonian Institution Compiling Record Of Indian Sign Language

The strangest dictionary ever compiled, listing not words but signs, is being completed at Washington to rescue from oblivion the Indian sign language which was once North America's "universal tongue" from coast to coast. Hundreds of signs and their word meanings are being listed on cards by Smithsonian institution scientists with the aid of Richard Sanderville, 70-year-old Blackfoot Indian, one of the last of his race who knows the sign language.

## The Canadian Shield

The central part of Canada is underlain by a great expanse of very ancient, hard crystalline rock known to geologists as the Canadian shield. This has an area of about 2,000,000 square miles, or more than half that of the whole Dominion.

Even small towns and rural districts in South Africa are feeling the prosperity wave.

Making a noise is one of the leading infant industries.

# STONY PLAIN'S DOMINION DAY SPORTS RESULTS

**Monday's Celebration  
Proves to Be Very  
Successful.**

**BIG CROWD ON THE  
OLD FAIR GROUNDS.**

**The Hearty Co-operation of  
All Made the Annual Sports  
Day Enterprise Another  
Big Hit.**

Stony's Sports Day on the 2d got away to a good start, thanks to the splendid management by the committee in charge. Shortly after 10, the ball teams matched against each other began the baseball tournament. These teams were Stony v Rosenthal; and after some good playing, the former won by a score of 17-3

The 2d game arranged, Centrals v Onoway, was won by Centrals by a score of 11-10. Witherspoon and Sinner battery for winners

Duffield and Bright Bank then took the diamond, the latter winning by a fairly good score.

In the elimination game the day before Centrals beat Holborn 10-3. Central's battery, Carl Loeblich & C Brox; Hol-

born battery, Kimmerley and Coombs; Referee, McCulla

The final contest was between Centrals and Stony; which the former won, 9-3 Central battery, C Loeblich & Sinner; Stony battery, P Enders & E Mayers.

Tournament winners: Centrals \$15; Stony \$10.

Following are the winners of some of the contests, a complete list not being available:

Basketball 1st prize \$10  
Won by Spruce Grove team

Tug-o-war, 1st prize \$5  
Won by Jamison, E Ulmer, H

Heichen, Carmichael, Litzenberger, Kuhl, Schulte, Fielhaber

Best pulling team of horses \$5.  
Won by Ph Fischer

100 yards, Men, \$2, 50c  
Don Carmichael 1, M Groat 2

Bicycle Race, \$1, 50c, 25c.  
John Holm 1, E Enders 2,

W Forster 3

Sack race, men, F Carmichael 1  
Geo Miller 2

Sack Race, ladies—Evelyn Miller 1, Emma Enders 2

Wheelbarrow race—Elsie Cooper, Evelyn Miller

Old man's race, W C Williams 1  
N Carmichael 2

Pie eating contest—H Goertz, J Goebel, Phil Schmidt and M

Groat

Men's Wheelbarrow Race—  
John Hoenig & John Ulmer 1

W & F Carmichael 2

Joe Enders & W Dewald 3

## Motes of the Day.

Members of the T. Cooper family were fairly successful in Monday's events. They secured a large number of the prizes at the Railway Maintenance picnic at Alberta Beach on Sunday

"Twas during the playing of the baseball games the "almost sad" accident happened when Mr Sam Comisarow lost his shirt—the Ripplishen article he'd promised to the player making the first home run. Reg. Armisted of Onoway got the shirt.

## Seen Every Day in Kansas.

The Bulletin has this to say of the strange spectacle seen in the sky last week, and which seemed to startle some of the natives pretty considerably:

"Stretching into the heavens like a huge twisting snake, a windspout, which appeared to be miles in height caused residents of the farming district southeast of Stony Plain to gaze in wonderment. The spout swept over Mr J Lutz's farm, tearing up the ground and pulling grass and grain out by the roots. A farmer at Connet, in describing the spout to the Bulletin, said: 'It was thin like a snake and seemed to reach 4 or 5 miles into the heavens. There was a cloud at the top just like a snake's head. It was a bright silver color.'

Another oldtimer, a former Kansan, said: 'Them's nuthin'. You can see ones like 'em 'most any day back in southwest Kansas. Why, the last summer I was afarmin' near Ransom, Kansas, one of them thar twisties done a funny thing to a neighbor o' mine; the ole feller was out plowing, and the windspout lifted him and the mules outen, the field over into another man's patch, and the pore ole feller didn't know the difference 'till he went to the shack for his feedin' and found he was on the wrong place."

**A GENERAL  
MOTOR  
VALUE**

**PRODUCED  
IN CANADA**

*Drive*

**Chevrolet's Extra Weight means  
Extra Value ... More Comfort ...  
Greater Safety ... Longer Car Life**

HERE'S something important to remember: Chevrolet gives you more weight than any other car in its class. More pounds of rugged, high quality materials in the Fisher Bodies, because Chevrolet doesn't skimp on comfort or safety! More pounds in the husky, solidly-built Chevrolet chassis, to safeguard dependability! And, best of all, you get these advantages of ample weight without any sacrifice of economy. Because, while it's a bigger, heavier car—faster and more powerful—Chevrolet uses less gasoline than ever! Drive the new Chevrolet and you'll never be satisfied with any other low-priced car!

**CHEVROLET**

**Sommerfield & Mayer, Stony Plain, Alta.  
Sommerfield-Mayer & Knight, Mayerthorpe.**

## SSB Lands Are Affected.

A bill which is of particular interest to Municipal authorities is that which transfers all SSB and other lands administered by the Director of Soldiers Land Settlement from the category of Crown lands to that of corporate lands, for the purpose of municipal taxation, according to a despatch from Ottawa.

This will mean that all such lands will be placed in exactly the same position in this respect as those privately owned, and will be subject to tax sale in default of payment of taxes. The State may, of course, make payment of these taxes in order to protect its equity in the property in case the settler himself is in default, but if this is not done, and if taxes remain unpaid, the lands may be listed for sale in precisely the same manner as those of any private farmer or other citizen.

Just what will be the position of the settler in case a Municipality does take action, is not clear, but it is improbable that it will be altered materially, as the director still retains his present power of protecting the interests of those under contract.
